ARPIT AGARWAL

Lead Frontend Developer

Summary

Passionate front-end web developer with more than 4 years of experience in building and maintaining responsive websites, including user requirements gathering, producing code and enhancing designs. Achieves compatibility targets while meeting and exceeding customer demands.

Experience

Senior Business Technology Associate Consultant (2018-03 – Current)

ZS Associates India Private Limited, Gurgaon, HR

- Lead the team of 10 engineers and completely build the Frontend designs with API services integration for the company's major client portfolios.
- Developed different Web Portals like Sales Planning, Meeting Analytics, Call Planning, Internal Assets like REVO, Javelin and Competency Leadership Assessment.
- Involved in all major product-level design discussions. Also, collaborated with project stakeholders during development processes to confirm creative proposals and design best practices for the solution.
- Worked on 30+ projects in different domain areas and clients having 85% customer Satisfaction ratio after delivery.
- Delivered engaging and visually compelling web designs with user-friendly UI that are cross-browser compatible and mobile responsive.
- Generated and managed cohesive design quality across different projects, adhering to prescribed themes and functional choices.
- Experience in all phases of Software Development Life Cycle including Analysis, Design, Development, Documentation, Testing, Deployment, Version Control and Product Support.
- Good knowledge of Agile best practices, including project workflow, site deployment and release practices/scheduling.
- Knowledge of Git practices via Bitbucket, Azure, git bash (command-line), git desktop (and other git clients).
- Also responsible for code review, training and supervision of team members on projects.
- Used programming capabilities in Angular 7+, Bootstrap, Ant-design Systems, Graph Libraries, SQL and JavaScript and other libraries as needed.

Software Developer   (2017-06 – 2018-02)

Astrea IT Services, Noida, UP

- Requirement gathering from clients.
- Demonstrating useful data in easy to read and understandable format.
- Improved data gathering, analysis and visualization procedures with strategic optimizations.
